

Base 3 Systems delivers knowledge

Through exceptionally well-documented training courses delivered by highly qualified instructors, re-enforced with relevant industry specific exercises and, if required, one to one mentoring.

About Base 3 Systems

Base 3 Systems is an established, highly regarded Software Consultancy and SAS Institute Consulting Alliance Partner, specialising in solutions to business problems using SAS® Software.

Our instructors are all experienced SAS consultants who have been using SAS software for many years. The approach we use is to tackle learning needs by reinforcing the technical information delivered on our training courses with comprehensive practical sessions, leading to much more workshop based, rather than 'stand and deliver' courses.

Our standard courses are appropriate for a wide range of abilities and centre around the core of the SAS System. All are developed with MS Windows in mind, however, they can be tailored to suit your operating system requirements.

The costs of courses are extremely competitive and will vary according to number of attendees, duration of course and individual requirements. Please note that, unlike our competitors, we do not offer public courses. Instead, our standard courses are delivered exclusively to your organisation at public course prices.

Base 3 Systems Head Office and Training Rooms

SAS® Web Report Studio

Course Aims

After attending this course, attendees should have a thorough knowledge of Web Report Studio, and be able to: build simple reports; customise the layout of reports; create graphical images; create templates; execute stored processes; export reports to Excel & HTML; apply conditional highlighting to reports; apply general filters; and create drill-down reports.

Duration

1 day

Required Knowledge

No previous knowledge of SAS software or Web Report Studio is assumed, however familiarity with MS Windows, a keyboard and a mouse is essential.
